

**IN THE SPECIFICATION:**

Please replace paragraph [6] of the specification with the following paragraph:

[6]           The perimeter ring 20 preferably has at least one post 27. Referring now to Figures 3a and 3b, a preferred embodiment of the deflection ring or cap is shown. Figure 3b shows a cross-section of a preferred embodiment of the deflection ring 30. The deflection cap ~~ring~~ 30 preferably has at least one post port 33 that receives a post 27 on the perimeter ring 20. The deflection ring 30 mounted on the perimeter ring 20 defines a light-mixing chamber. The deflection ring 30 further comprises notches 32 that align with the notches 22 on the perimeter ring 20 to define light ports for seating lights 25, e.g. LEDs. Each light 25 is preferably aimed to cast light into the light mixing chamber.
